1	Choice Under Uncertainty	1
1.1	Introduction	1
1.2	Risk, Uncertainty, and Lotteries	2
1.3	Expected Utility and Risk Premium	7
1.4	Risk Aversion and Asset Demand	17
	References	20
2	Modern Portfolio Theory	21
2.1	Introduction	21
2.2	The Risk–Return Trade-Off	22
2.3	The Global Minimum Variance Portfolio	24
2.3.1	2-Risky Assets	24
2.3.2	3-Risky Assets	34
2.4	Mean-Variance Asset Allocation	39
2.4.1	Deriving Optimal Weights	40
2.4.2	The Portfolio Frontier	46
2.4.3	A Graphical Representation of the Portfolio Frontier	47
2.4.4	The Global Minimum Variance Portfolio	49
2.4.5	The Efficient Frontier	51
2.4.6	The “Two-Fund” Separation Theorem	53
2.5	Adding a Riskless Asset	54
2.5.1	Deriving Optimal Weights	55
2.5.2	The Efficient Frontier	56
2.5.3	The Tangency Portfolio	57
2.5.4	The “One-Fund” Theorem	62
2.6	Bringing Theory to Practice: Implementing Mean-Variance Allocation	65
2.6.1	Economy with $N = 5$ Risky Assets	65
2.6.2	Economy with $N = 5$ Risky Assets + 1 Riskless Asset	68
	References	71
3	The Capital Asset Pricing Model	73
3.1	Introduction	73
3.2	The CAPM Assumptions	74
3.3	The Market Portfolio	75

3.4	Deriving the CAPM	78
3.5	The Security Market Line	87
3.6	The (Index) One-Factor Market Model	92
	References	96
4	Empirical Analysis of the CAPM	97
4.1	Introduction	97
4.2	The CAPM: A Historical Overview	98
4.3	Time Series Analysis	102
4.3.1	Univariate Regressions	102
4.4	Empirical Applications	110
4.4.1	Testing CAPM Validity	111
4.4.2	Time-Varying Alpha and Beta	114
	References	119
5	The Consumption CAPM	121
5.1	Introduction	121
5.2	The Model	122
5.3	The Stochastic Discount Factor	127
5.4	Pricing a Riskless Security	129
5.5	Deriving the CCAPM	130
5.6	CCAPM vs. CAPM	135
5.7	Testing the CCAPM: The Equity Premium Puzzle	137
	References	156
6	Arbitrage Pricing Theory and Multifactor Models	159
6.1	Introduction	159
6.2	Anomalies in Asset Returns	160
6.3	The Arbitrage Pricing Theory	162
6.4	Multifactor Analysis	175
6.5	Empirical Applications	180
6.5.1	The Three-Factor Fama–French Model	180
6.5.2	An Uncertainty-Augmented CAPM	183
	References	185
7	Empirical Cross-Sectional Asset Pricing	187
7.1	Introduction	187
7.2	Cross-Sectional Tests	188
7.3	Major Econometric Issues	191
7.4	Empirical Applications	193
7.4.1	The EPU Risk Premium	195
7.4.2	The Temperature Risk Premium	198
	References	202
8	The Black–Litterman Model	203
8.1	Introduction	203
8.2	The Market Equilibrium	205

8.3	The Investor's Views	208
8.4	Integrating Views	210
8.5	Into the Math of Black–Litterman.....	214
8.6	The Distribution of $\mathbf{r}$ in the Black–Litterman	217
8.7	Bringing Theory to Practice: Implementing Black–Litterman	218
	References	222
9	Event-Study Analysis	223
9.1	Introduction	223
9.2	Empirical Methodologies	228
9.2.1	Cumulative Abnormal Returns (CARs)	228
9.2.2	Regression Analysis	230
9.3	Empirical Applications	232
9.3.1	Aviation Disasters: CARs	232
9.3.2	Aviation Disasters: Regression Analysis	236
9.3.3	Leveraging Aviation Disasters	240
