

TABLE OF CONTENTS

INTRODUCTION	7
CHAPTER 1. HIGH-PRECISION MEASUREMENT OF THE AIR TEMPERATURE USING A RTD PT100 SENSOR.....	18
1.1. Theory	18
1.1.1. Temperature measurement using RTDs	18
1.1.2. Precious metal RTDs	18
1.1.3. PRTD signal conditioner	20
1.1.4. Data Acquisition (DAQ) Board.....	21
1.1.5. The RTD Resistance Calculation.....	22
1.2. Laboratory setup	22
1.2.1. Hardware configuration	22
1.2.2. The software application.....	23
1.3. Tasks.....	24
CHAPTER 2. MEASUREMENT OF THE SOLAR IRRADIATION COMPONENTS.....	25
2.1. Theory	25
2.1.1. Direct, Global and Diffuse Solar Radiation	25
2.1.2. Measurement Instruments.....	26
2.1.2.A. CMP6 Pyranometer.....	26
2.1.2.B. CHP 1 Pyrheliometer	27
2.1.3. Direct, Global, and Diffuse Solar Radiation Measurement	28
2.1.3.A. Data Acquisition (DAQ) Board	28
2.1.3.B. Direct Solar Radiation Measurement	29
2.1.3.C. Global Solar Radiation Measurement	30
2.1.3.D. Diffuse Solar Radiation Calculation	30
2.2. Laboratory setup	30
2.2.1. Hardware configuration	30
2.2.2. The software application.....	31
2.3. Tasks.....	31
CHAPTER 3. A SOUND LEVEL METER USING AN ARDUINO.....	32
3.1. Theory	32
3.1.1. What does sound intensity level mean?	32
3.1.2. How to calculate sound intensity level?	32
3.1.3. Propagation of sound in the environment	35
3.2. Laboratory setup	35
3.2.1. A brief description of the individual components of the developed Arduino sound level meter.....	35
3.2.2. Description of the connection and construction of the Arduino sound meter	38
3.2.3. Arduino sound meter programming and program description	41
3.2.4. Arduino sound meter calibration.....	45

3.2.5. Data collection from a sound level meter via a computer	46
3.2.6. How to work with an Arduino sound meter.....	46
3.3. Tasks	47
3.3.1. Noise measurement in the room	47
3.3.1.A. Measurement procedure	47
3.3.1.B. Data analysis	48
3.3.2. Noise measurement in the place of residence or school	48
3.3.2.A. Measurement procedure	48
3.3.2.B. Data analysis	49
3.3.3. How does sound intensity level change with distance?.....	50
3.3.3.A. Measurement procedure	50
3.3.3.B. Data analysis	51
CHAPTER 4. HOW TO MAKE A GEIGER-MÜLLER COUNTER USING A MICROCONTROLLER?	53
4.1. Theory.....	53
4.1.1. Ionizing radiation and its measurement	53
4.1.2. A brief description of the individual components of the GM detector	55
4.2. Laboratory setup	58
4.2.1. Description of the connection and construction of the Arduino GM detector	58
4.2.2. Programming the Arduino GM detector and description of the program	58
4.2.3. Data collection via computer	61
4.3. Tasks.....	62
4.3.1 How to use a GM in measurement and protect yourself from radiation (distance protection).....	62
4.3.1.A. Measurement procedure	62
4.3.1.B. Data analysis	63
4.3.2. How to protect yourself from radiation (shielding protection)	64
4.3.2.A. Measurement procedure	64
4.3.2.B. Data analysis	64
CHAPTER 5. A METEOROLOGICAL STATION BASED ON AN ARDUINO	67
5.1. Theory.....	67
5.1.1. A brief description of each component of the meteorological station.....	67
5.1.2. Description of the connection and construction of the meteorological station	70
5.2. Laboratory setup	73
5.2.1. Programming the meteorological station and description of the program	73
5.2.2. Data collection via computer	75
5.3. Tasks.....	77
5.3.1. Use in measurement. Meteorological observation	77
5.3.1.A. Measurement procedure	78
5.3.1.B. Data analysis	78

CHAPTER 6. A KIT OF PM SENSOR DESCRIPTION AND HOW IS MADE	
A PM SENSOR	80
6.1 Theory	80
6.1.1. Kit content and the role of each component	80
6.1.2. How to make a PM Smoggie sensor using a kit?.....	84
6.2. Laboratory setup	85
6.2.A. How to Power the ESP8266 WeMos D1 Mini?	85
6.2.B. How to flash the program code on the ESP8266 WeMos D1 Mini	86
6.3. Tasks.....	88
Chapter 7. 3D PRINTING. BASIC CONCEPTS ABOUT HOW TO PREPARE YOUR	
MODEL FOR 3D PRINTING	90
7.1. Theory	90
7.2. Laboratory setup	91
7.3. Tasks.....	94
CHAPTER 8. ACQUISITION OF THE DATASETS COLLECTED BY SENSORS	101
8. Theory	101
8.1. Sensor Network Description.....	101
8.2. Laboratory setup: Reading information from sensors	102
8.3. Tasks.....	103
8.3.1. Datasets downloading.....	103
8.3.2. Data organization.....	108
CHAPTER 9. PROCESSING AND CORRELATIONAL ANALYSIS	
OF SENSOR DATA ACQUISITION	109
9.1. Theory	109
9.1.1. Import Data from CSV Files into Excel	109
9.1.2. Data Centralization.....	110
9.1.3. Summarize Data with the PivotTable Tool	111
9.1.4. Plot Chart Generation and Data Flow Interpretation	113
9.2. Correlation Analysis	114
9.2.1. Calculation of Correlation Coefficients Using Analysis Toolpak.....	114
9.2.2. Correlational analysis between CO ₂ , noise, CH ₂ O and O ₃ parameters.....	116
9.3. Tasks.....	120
CHAPTER 10. A STATISTICAL ANALYSIS OF THE DATA GIVEN	
BY AN AIR QUALITY MONITORING STATION: ADANA CASE.....	122
10.1. Theory	122
10.1.1. Outdoor air pollution description.....	122
10.1.2. Outdoor Air Pollution Requirements	123
10.2. An example of working with a dataset	128
10.2.1. Climatic Conditions	128

10.2.2. Sensors' location	129
10.2.3. Data Collection	129
10.3. Data Analysis.....	134
10.3.1. Data Collection	135
10.3.2. Data Upload	135
10.3.3. Descriptive Analysis.....	139
10.3.4. Data Visualization	140
10.3.5. Regression Analysis	143
10.3.6. Correlation Analysis.....	145
10.3.7. SPSS Extensions.....	147
10.4. Conclusions.....	148
